

THE QUIZ GAME

DESIGNED BY:

PROJECT GROUP 7

DEPARTMENT: ECE

COURSE: CSE 115 L

LAB INSTRUCTOR: FAHIMUL HAQUE SHUBHO

MEMBERS:

SABBIR HOSSAIN (2131272642)

SUMAYYA MEHJABIN TAJIN (2132107642)

ARITRA ISLAM SASWATO (2132629642)

Contributions:

```
void help();
void read_scoreboard();
```

```
void reset_score();
void password();
void view_score(float score, char
playername[20]);
```

All three of us have equally contributed together in all the functions. We all coded together with the help of each other using Google meet.

DESCRIPTION:

Welcome to the Quiz Game! Here you will have a set of 10 multiple-choice questions of options A, B, C and D. You will win cash price if you can get them right. Each question will be worth a significant amount of money and if you can get them all correct, you get to win One Million Dollars! Unfortunately, if you get an answer wrong at the start or middle of the game, you will not get anything.

So sit back and relax as you enter the game.

BEST OF LUCK!!!

MOTIVATION:

This project is a game which is meant to test and encourage you over your knowledge on general and C programming related questions. It rewards you with money if you get an answer right and corrects you to the right answer if you get it wrong. It is a perfect source of entertainment with your friends.

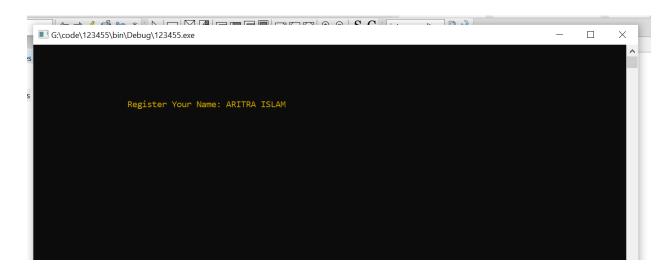

Features:

- This is a game of single round.
- There will be a set of questions.
- The players will win points as prices as per questions answered right.
- Anyone can play this game.

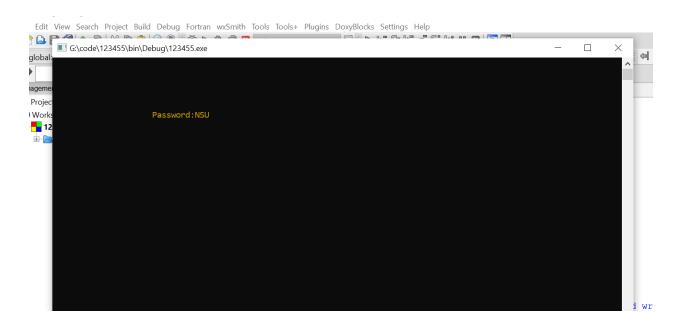

CONCEPTS:

IF ELSE
SWITCH-CASE
LOOP
FUNCTIONS
STRING INPUT
FILES

SNAPSHOTS:

USERNAME AND PASSWORD:

MAIN MENU:

QUESTIONS:

WHEN CORRECT-

WHEN WRONG:

HELP OPTION:

SCOREBOARD:

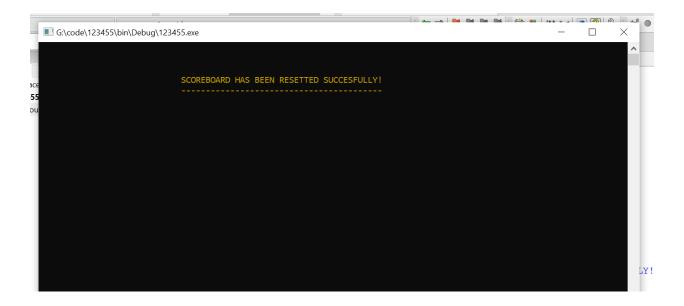

```
TAJIN

800000.00

5 ARITRA
300000.00

SABBIR
500000.00
```

RESET OPTION:

CONCLUSIONS:

We learned about the value of teamwork and the patience to make a project successful by trial and error. We also learned about time management and how teamwork can solve a problem in a code easily.

Problems:

We faced buffer issues in string input for multiple times. We had problems saving the score properly in the file and showing it in the console.

It is possible to get the highestscore from the file's data by using array.
